

Testing Date & Time: _____

Wi-Fi Probe Request Analysis: Testing Agreement

This document serves to acknowledge the engagement between the Device Owner and Security Researcher to gather and process passive data of all the active, Wi-Fi enabled system(s) or devices, which are in the vicinity of the testing location. All the gathered information will be anonymized before being published.

Components of the testing procedure
Scanning & Collecting Wi-Fi Probe Requests of my devices for 24h
Gathering of passive background data (SSIDs, MAC Addresses, Device Information, etc.)
Cross-referencing captured data with third party data, as example geographic location data
Anonymized publishing of the data

All parties, by signing below, accept and agree that:

1. The testing will preserve the operational status of all systems.
2. The researcher is authorized to perform the actions listed in the components above, at their discretion using appropriate tools and methods.
3. Test results are related to specific tests only. They indicate, but do not and cannot measure, the overall security posture (quality of protections) of a device or system.
4. All information related to this testing will be anonymized.
