

Testing Date & Time: \_\_\_\_\_

## Wi-Fi Probe Request Analysis: Testing Agreement

This document serves to acknowledge the engagement between the Device Owner and Security Researcher to gather and process passive data of all the active, Wi-Fi enabled system(s) or devices, which are in the vicinity of the testing location. All the gathered information will be anonymized before being published.

Indicate the permission for the actions which are allowed to be completed, by your initials.

Components of the testing procedure	Device Owner
Gathering of Publicly Available Information	
Scanning for Wi-Fi Probe Requests	
Association with third party data	
Anonymized publishing of the data	
<b>ALL THE ABOVE</b>	

All parties, by signing below, accept and agree that:

1. The testing will preserve the operational status of all systems.
2. The researcher is authorized to perform the actions listed in the components above, at their discretion using appropriate tools and methods.
3. Test results are related to specific tests only. They indicate, but do not and cannot measure, the overall security posture (quality of protections) of a device or system.
4. All information related to this testing will be treated as highly confidential Level III security data (DSL3), with commensurate protections.
